

Analytical Index

This chart appears at the start of "The Impoverished Students' Book of Cookery, Drinkery & Housekeeping" by Jay F. Rosenberg. It's the only book we've ever seen which has a flowchart as its index.

The author of Interactive Retroflow credits this book with keeping him alive throughout his student years.

Although originally published in 1965 (the flowchart in the book is hand drawn) it is remarkably still in print and available through the Reed College Bookstore. See <https://bookstore.reed.edu>
